

1 **NOTICE

- >Make sure that your desktop version of Excel is up to date.
- >Please note that the VBA code is only available in the desktop version of Excel and will not work in the Excel Web version.
- >Excel sheets with multiple formulas and VBA codes run much slower and take over three times longer to process actions compared to Google Sheets.
- >The code may take longer to run if there are many titles on the sheets.
- >Please keep in mind that any action performed by VBA code cannot be undone, unlike Google scripts.

3

Open the Sheet

4

Click Enable Content

The screenshot shows a Microsoft Excel window with a yellow security warning bar at the top. The bar contains the text "SECURITY WARNING Macros have been disabled." and a blue "Enable Content" button. A mouse cursor is positioned directly over the "Enable Content" button. The main spreadsheet area displays a table of broadcast information, including columns for CHANNEL, TITLE, VERSION, DUR, PRODUCER, PROG DATE, START DATE, and KILL DATE. The data includes various stations like ANIMAX, GEM, and GBI, along with their respective program details. The bottom of the Excel window shows a ribbon with tabs like TITLE LIST, ##, 018.NTV-HD, 01C.TVB-HD, 02A.MAC-SD, and 03A.TRV-HD.

CHANNEL	TITLE	VERSION	DUR	PRODUCER	PROG DATE	START DATE (DD/MM/YY)	KILL DATE (DD/MM/YY)

5

It should look like this page before reformatting the sheets.

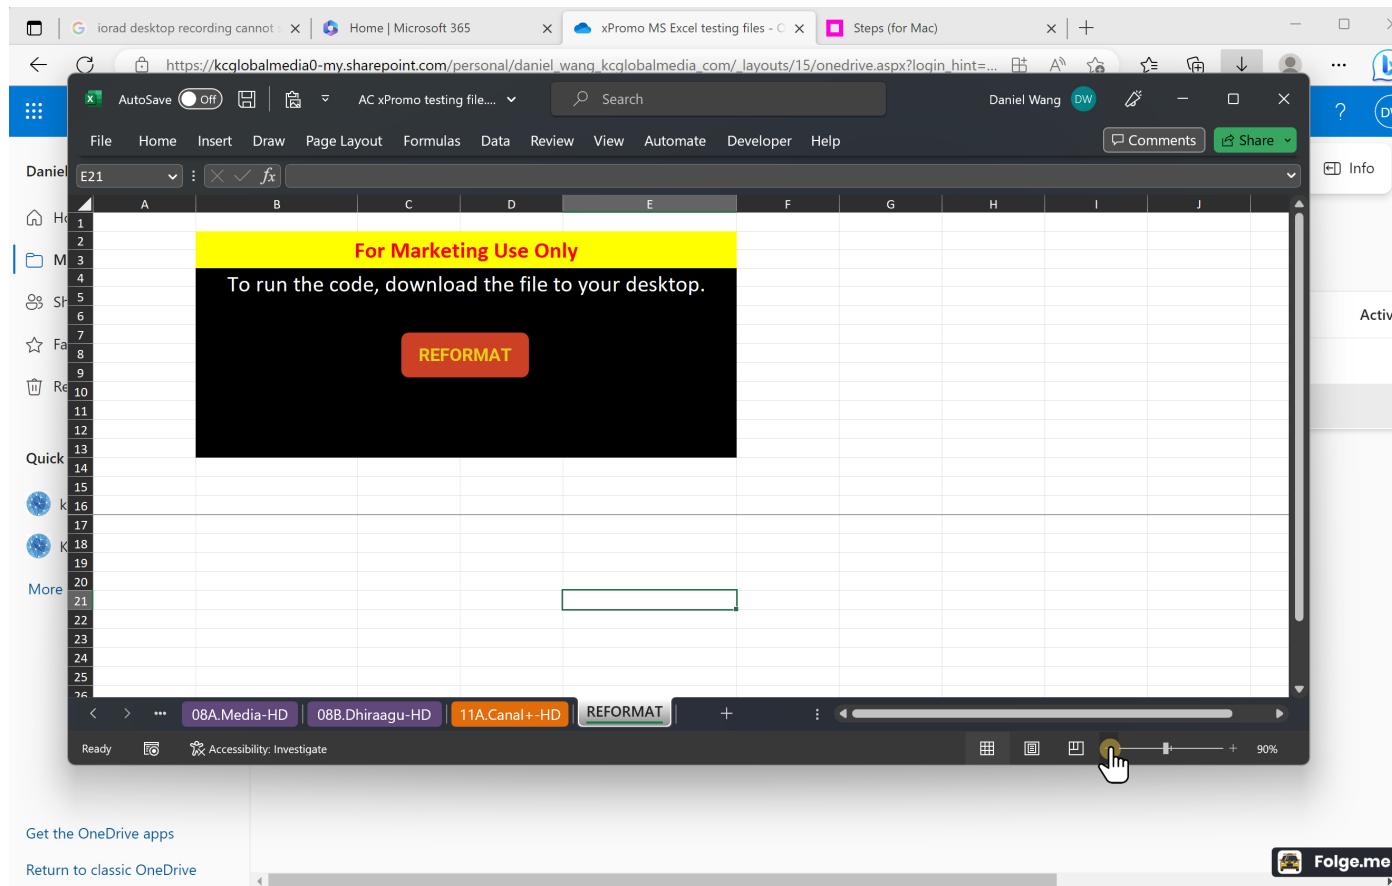

The screenshot shows a Microsoft Excel spreadsheet titled "KC GLOBAL MEDIA | CROSS PROMOS COMPILATION". The table has the following columns: TIMECODE, CHANNEL, TITLE, VERSION, DUR, PRODUCER, PROG DATE, START DATE (DD/MM/YY), KILL DATE (DD/MM/YY), REMARKS, and AUDIO. Rows 18 through 28 are highlighted in yellow, indicating specific items of interest. The rows contain notes such as "Add 'CNA 515 / 604' with ONE Bug on top left", "Provide separate promos in Mandarin & English", "Use last frame of Singtel CTA end tag (with provided vcf)", and "Add '515' with ONE Bug on top left". The "AUDIO" column shows entries like "ENG FM" and "MAND FM". The bottom of the screen shows the OneDrive ribbon and a Folge.me watermark.

TIMECODE	CHANNEL	TITLE	VERSION	DUR	PRODUCER	PROG DATE	START DATE (DD/MM/YY)	KILL DATE (DD/MM/YY)	REMARKS	AUDIO

6

Go to sheet REFORMAT

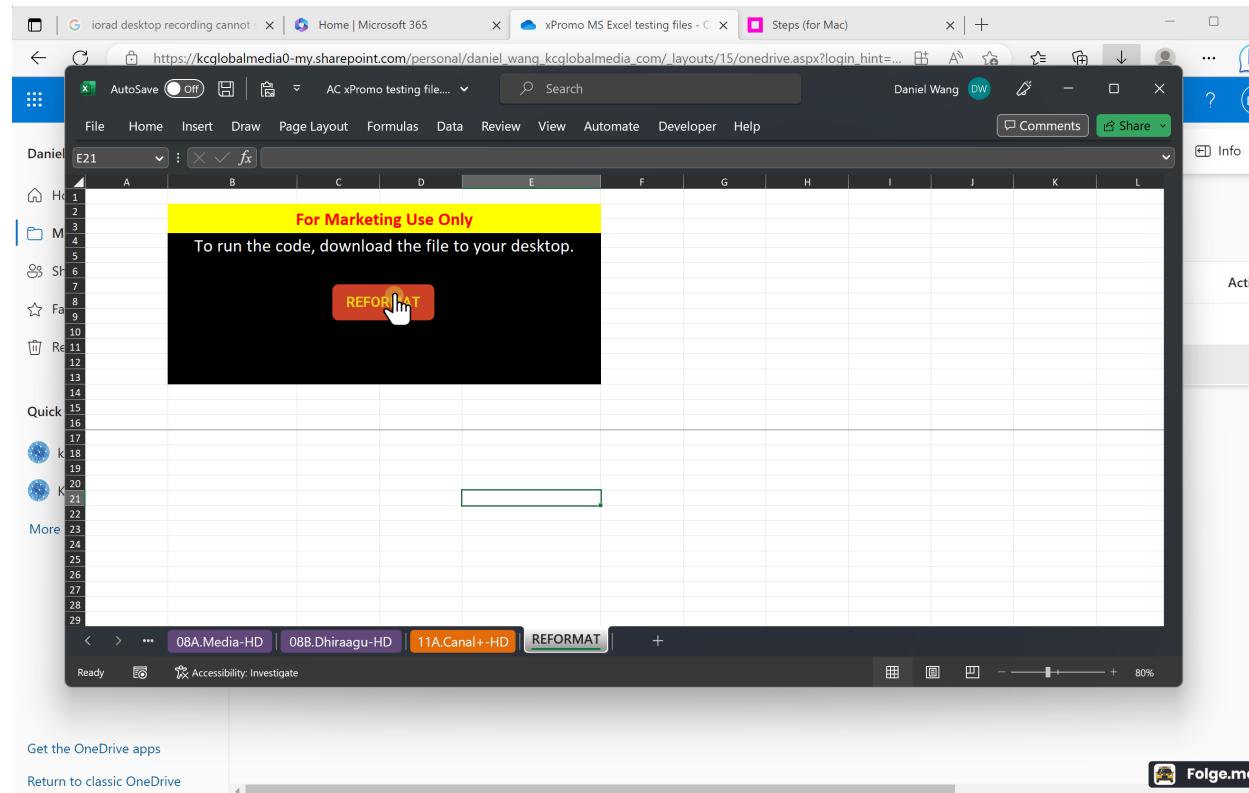

The sheet is located on the rightmost side of the tabs.

7

Click REFORMAT Button.

To check if the VBA code is running, try selecting any blank cell. If you can't select the cell, it means the code is processing and may take at least 4 minutes to complete.

8

After it is done, each affiliate sheet should look like this page.

The VBA code is used to delete/hide formulas and unnecessary columns and rows.

10 Save PDF

- >The shortcut to save as a PDF is **Ctrl + Shift + F** for both Mac and Win.
- >It's a VBA code, it's only available in the xPromo sheets.
- >The file name will retrieve the affiliate name followed by the current date.

11

To check where the system saved the PDF file that VBA just created, search for the affiliate's name, such as SINGTEL.

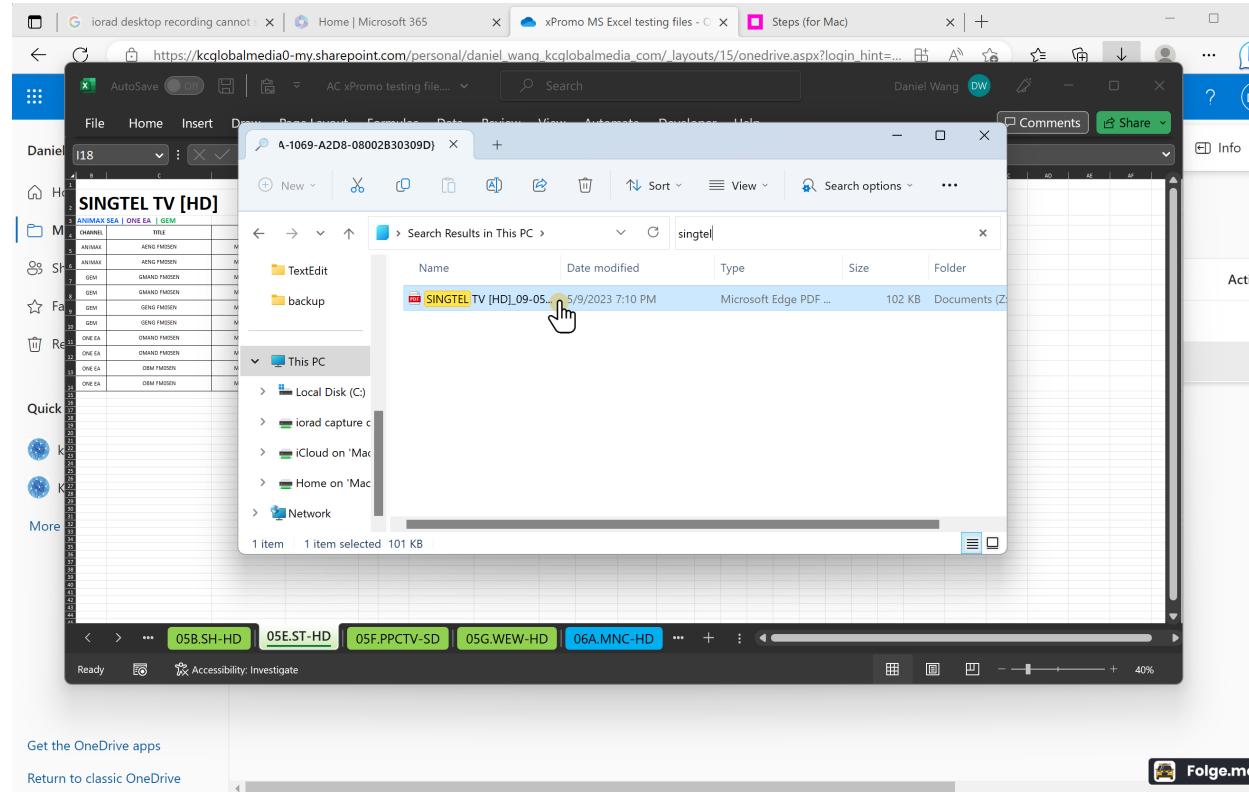

12

After searching for the affiliate's name, you can find the PDF file and its location.

Right click the file, and click Properties to check location.

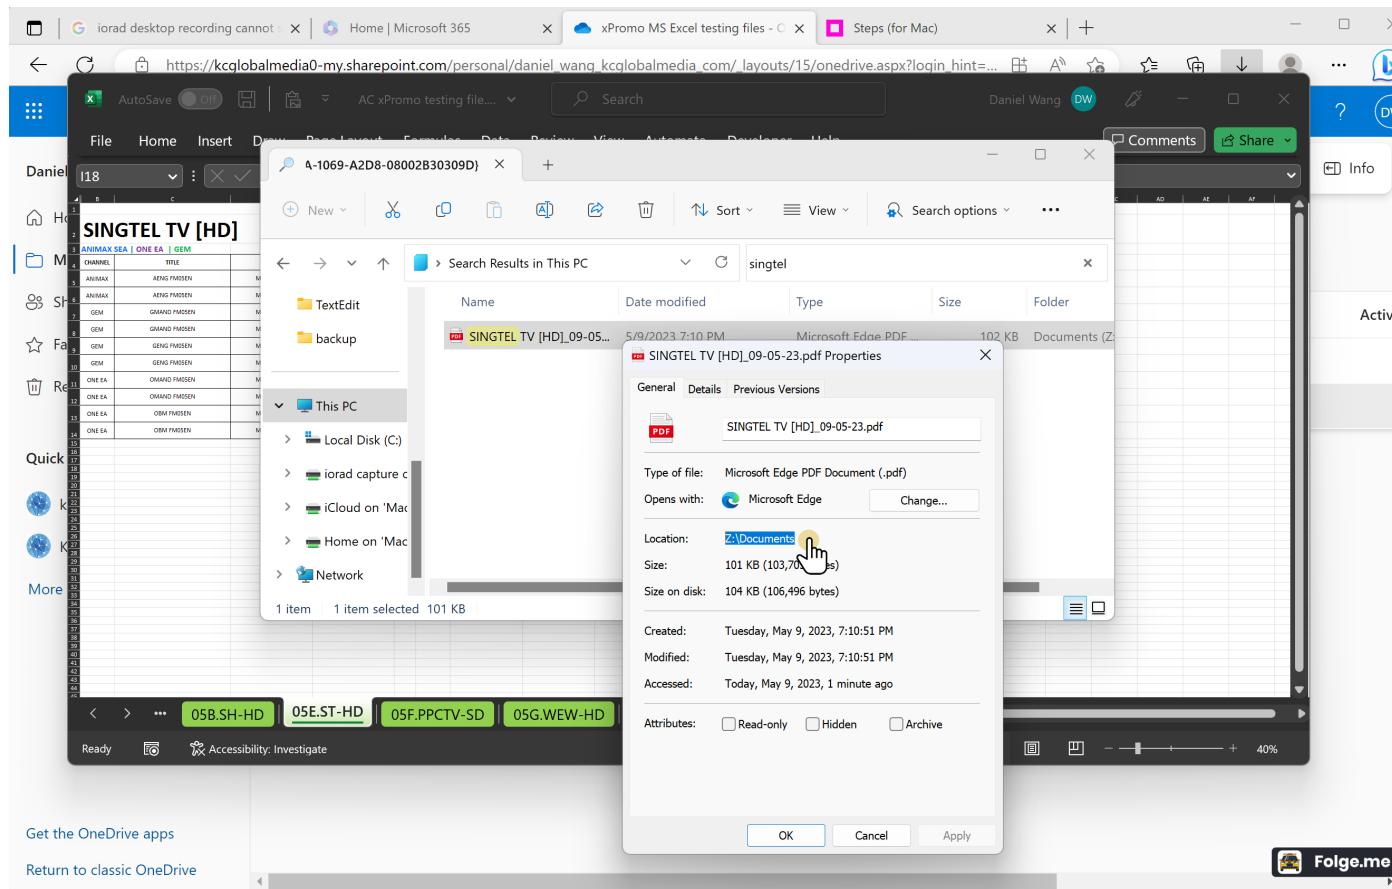

Consider creating a desktop shortcut to the file storage folder for convenience.

13

The date format of the file name can be changed when generating the PDF file.

Please let me know which date format you prefer.

14

That's it. You're done.
